## EMS Billing Services

### Fire Recovery EMS

We specialize in customized outsourced billing solutions for EMS providers, including large municipalities, fire protection districts, volunteer departments, rural departments and private ambulance services. Our goal is to provide customized EMS billing solutions that reduce your costs while increasing your revenue.

Our corporate objective is to provide the highest standards of quality and professionalism. It is our dedication to this which builds our reputation and relationships.

With over 30 years in the industry, we are dedicated to providing experienced, knowledgeable and efficient customer service to ensure that your patients are treated with dignity and compassion.

### First Responder Support Services

There are real costs to responding to medical incidents. While EMS transport units typically bill under medical coverage, first responders are left to absorb the enormous cost of providing their services. Fire Recovery USA has developed a program which allows tracking and

billing for ALS/BLS first responses, helping offset the costs incurred. Fire Recovery USA bills and collects these charges, and passes the revenue directly to your department monthly.

### Paramedic Subscription Program

In conjunction with our First Responder Support program our Paramedic Subscription offers an “Insurance Policy” to help cover the first responder fees for your residents. Our program allows residents to pay an annual affordable fee to cover the possible first responder event. This fee can even be included in a utility payment (if available) for a resident or business and it will cover any incident for their family or employee.
